

Open Data for Research Analytics: The SHARE Notification Service

Andrew Sallans, Center for Open Science

NORDP Annual Research Development Conference

Spring 2015

Founded by Academic Leaders Built with Open Technology

Research universities are long-lived and are mission-driven to generate, make accessible, and preserve over time new knowledge and understanding.

What is SHARE?

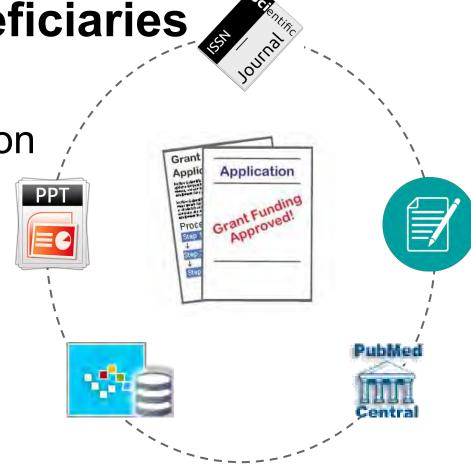

SHARE is creating an open data set about research activities across their life cycle. This comprehensive inventory of research will be widely accessible, discoverable, and reusable.

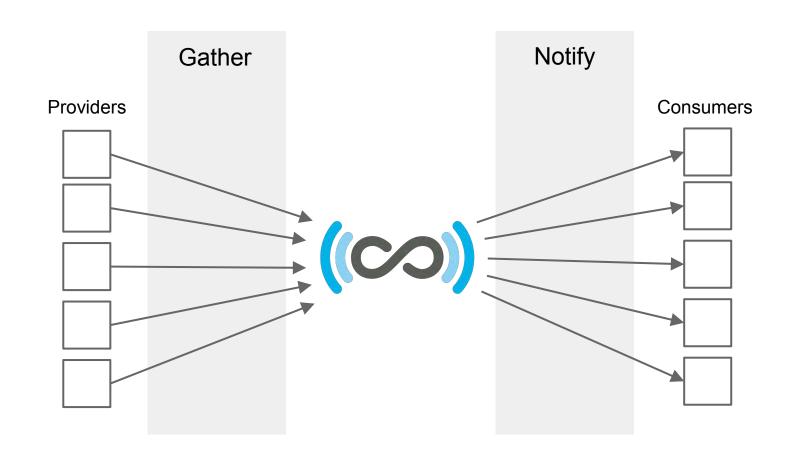

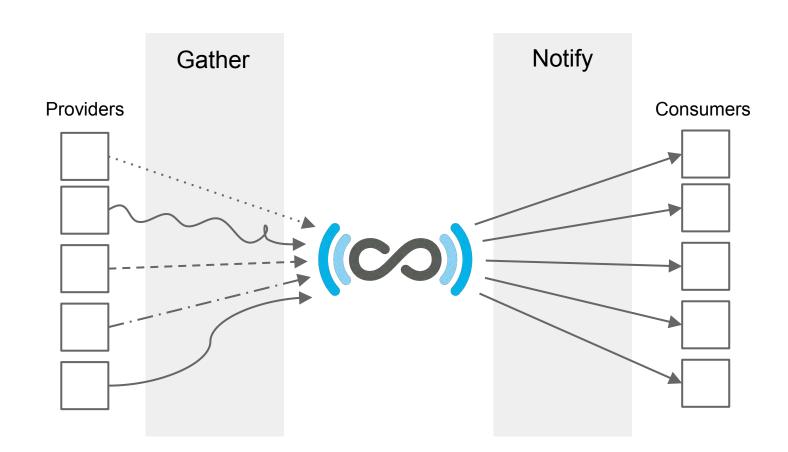

Stakeholders/beneficiaries

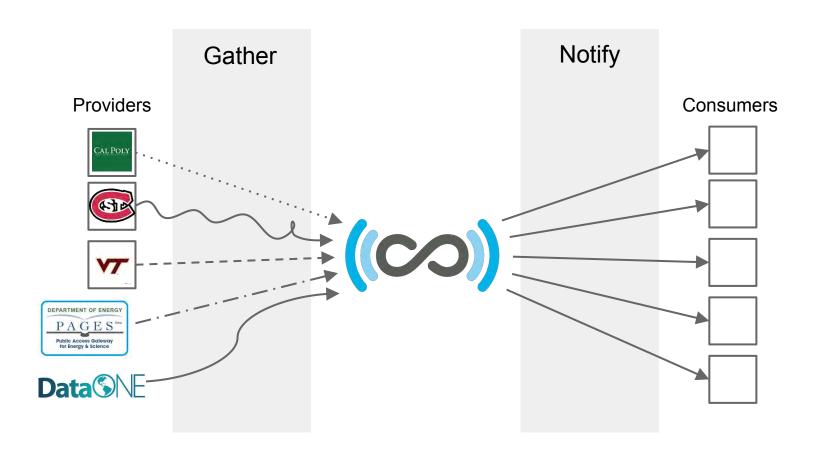

- Researchers
- Higher ed administration
- Libraries
- Repositories
- Research funders

Open data allows for innovation

Scholars Portal Dataverse A Service of the Ontario Council of University Libraries

of SCIENCE

The rising STAR of Texas

COLUMBIA UNIVERSITY

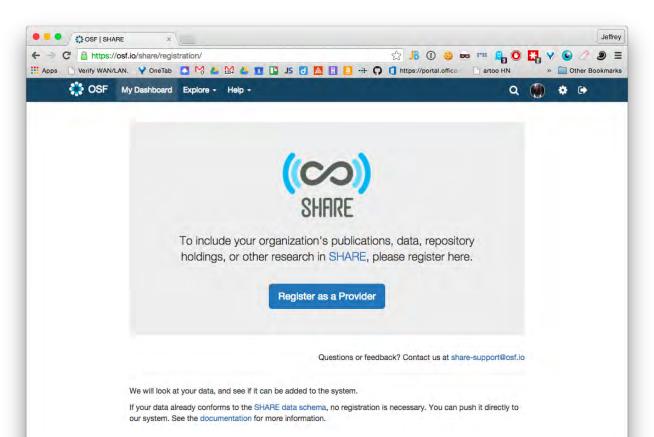

ACADEMIC COMMONS

After only a few months...

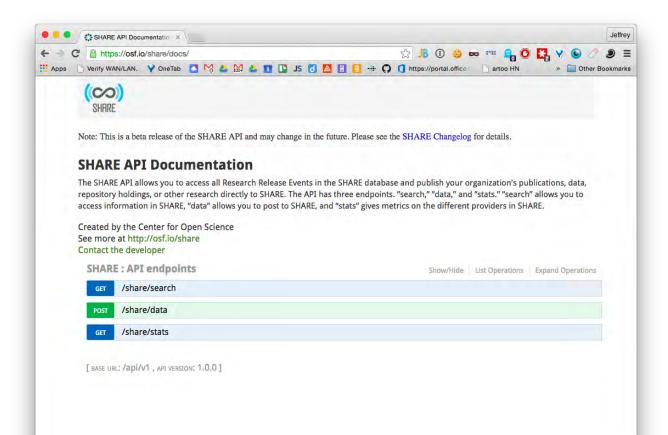

700,000+ research release events

30 content providers (about 10 more in development)

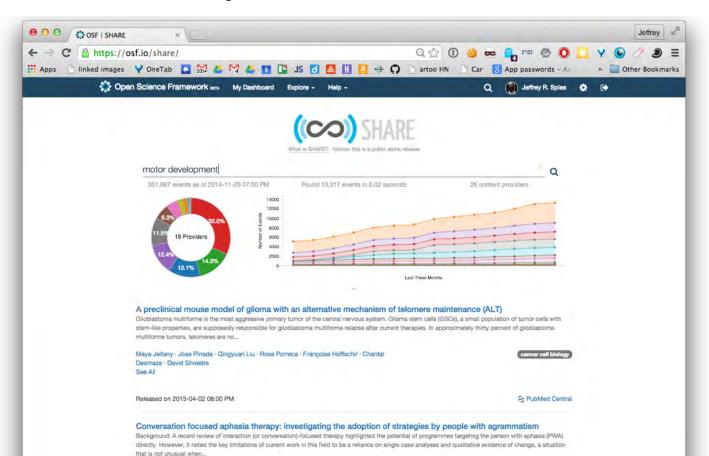

osf.io/share/registration

osf.io/share/docs

http://osf.io/share

What does this mean for you?

- Competitive analyses
- Matchmaking
- Broad scope of content

- FREE TO USE
- DATA IS OPEN
- INVITATION TO CONTRIBUTE

Under the hood

- Modularity
- Reliability
- Flexibility
- Scalability

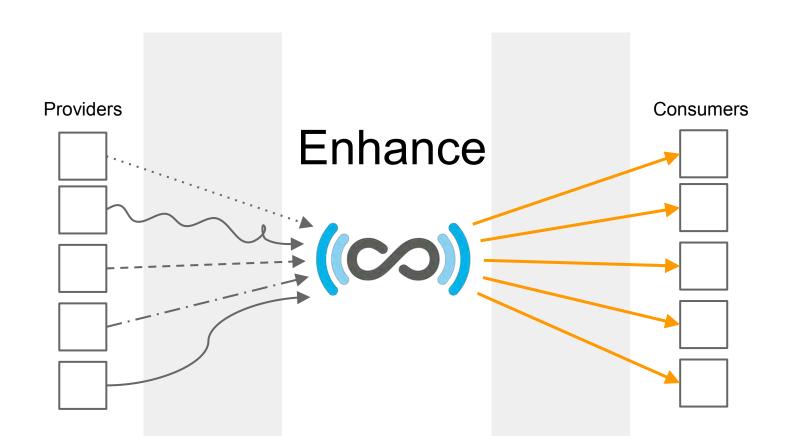

Live demo

What we've learned

- Metadata is used inconsistently across the research ecosystem
- Providers are unsure of their rights to share metadata
- Solutions will involve improvements to workflow, policy, and technical infrastructure

Where we're going

- Analyze stakeholders' current processes through which research passes from conception to completion
- Promote and reward policies that encourage data sharing
- Deploy multiple strategies to enhance metadata in open data set

Enhancement

- Open
- Collect
- Identify
- Connect

SHARE is a Community Project

Opportunities for participation:

Infrastructure

https://github.com/centerforopenscience/share https://osf.io/wur56/wiki/

Policy/Workflow

SHARE Working Group Standards, identifiers, behaviors

Help us make this work for you

How would you use SHARE?

What would you need it to connect to?

What content would it need to have?

Interest in piloting?
