

# Research Intelligence

Actionable insight for Research Executives

Elsevier's Research Intelligence solutions combine quality, structured, interoperable data, advanced analytics and an array of indicators and metrics to provide research executives with key insights to address critical challenges and expand research excellence.

## Research Strategy

Combine data and insight about your institution and the global research landscape to inform planning and setting research priorities

## Conducting Research

Discover relevant research and enhance research workflow and productivity across the research enterprise

## Expertise & Collaboration

Identify researchers and cross-sector partners to establish and advance collaborative and interdisciplinary research initiatives

## Research Management

Optimize tracking and administration of research information to make evidence-based program decisions with confidence

## Research Funding

Gain a holistic view of global research funding to identify the most relevant funding opportunities, investigate grant awards and manage applications and awards

## Impact & Engagement

Increase the visibility of research and experts to build a reputation for research excellence and impact and to advance open science and scholarship
